

Aethar Tech

Roadmaps

This document defines clear, achievable monthly goals for the three pillars of Aethar Tech:

1. **AI Development (R3KON GPT & Cybersecurity Toolkit)**
2. **Marketing & Business**
3. **Analytics & UI (R3KON GPT & Nyx Browser)**

The focus is on realistic execution, technical depth, and long-term sustainability.

1. AI Development Roadmap (R3KON GPT)

Core Objectives

- Faster inference & response time
- Smaller, optimized packaging
- Unique offensive & defensive cybersecurity tools
- Modular architecture (scalable, maintainable)

Month 1 – Performance Foundations

Goals:

- Profile R3KON GPT performance bottlenecks
- Identify slow components (model loading, prompts, tools)

Deliverables:

- Benchmark: response time (cold vs warm start)
- Decide on model optimization strategy (quantization, caching)
- Refactor prompt structure for efficiency

Month 2 – Speed & Packaging Optimization

Goals:

- Reduce startup time
- Reduce binary/package size

Deliverables:

- Lazy-load tools instead of loading all at startup

- Compress assets & remove unused dependencies
- Target: 30–40% faster response

Month 3 – Offensive Toolkit (Phase 1)

Goals:

- Build unique recon & analysis tools (not basic scanners)

Tools to Implement:

- Advanced recon aggregator (DNS, headers, tech fingerprinting)
- Misconfiguration analyzer (headers, CORS, CSP, cookies)
- Input reflection & injection surface mapper

Deliverables:

- Modular offensive toolkit v1
- Clear ethical use warnings

Month 4 – Defensive Toolkit (Phase 1)

Goals:

- Shift focus to blue team value

Tools to Implement:

- Attack log analyzer (DDoS / brute-force patterns)
- Security header hardening advisor
- SOC-style incident summarizer

Deliverables:

- Defensive toolkit v1
- OWASP Top 10 mapping

Month 5 – Intelligence & Context Awareness

Goals:

- Make R3KON GPT *context-aware*

Deliverables:

- Session memory (per task, not global)
- Smarter tool auto-selection
- Confidence scoring for results

Month 6 – Stability & Release Candidate

Goals:

- Harden for public usage

Deliverables:

- Crash handling & graceful failures
- Tool sandboxing
- Public-ready release

2. Marketing & Business Roadmap

Core Objectives

- Build credibility
- Identify partnerships
- Introduce ethical, sustainable revenue

Month 1 – Brand Positioning

Goals:

- Define what Aethar Tech *is and is not*

Deliverables:

- Clear positioning statement
- Mission & values(Technology that endures)
- Consistent branding language

Month 2 – Online Presence

Goals:

- Visibility without hype

Deliverables:

- Landing page or Notion site
- LinkedIn presence (founder + company)
- Publish 2–3 technical posts

Month 3 – Partnership Discovery

Goals:

- Identify strategic allies

Targets:

- Universities & cyber clubs
- Small ISPs / tech hubs
- Developers & open-source communities

Deliverables:

- Partnership outreach list
- 3–5 formal conversations

Month 4 – Revenue Exploration

Goals:

- Test monetization without killing trust

Options:

- Pro features (advanced tools)
- Consulting / audits
- Training & workshops

Deliverables:

- Revenue model draft
- Pricing hypotheses

Month 5 – Community Building

Goals:

- Build a loyal user base

Deliverables:

- Discord / Telegram / GitHub
- Feedback loops
- Early adopters group

Month 6 – First Monetization Launch

Goals:

- Validate revenue model

Deliverables:

- Pilot paid offering
- Measure conversions
- Adjust pricing

3. Analytics & UI Roadmap

Core Objectives

- Understand user behavior
- Improve usability & aesthetics
- Maintain performance

Month 1 – Analytics Foundations

Goals:

- Gain visibility into usage

Tracking Metrics:

- App starts
- Active devices
- Session duration
- Feature usage

Deliverables:

- Privacy-respecting analytics module
- Local + optional remote logging

Month 2 – Usage Intelligence

Goals:

- Understand how R3KON GPT is used

Deliverables:

- Feature heatmaps
- Error frequency tracking
- Tool usage ranking

Month 3 – R3KON GPT UI Improvements

Goals:

- Reduce cognitive load

Deliverables:

- Cleaner layout
- Tool grouping (Offensive / Defensive)
- Status indicators (running, success, failed)

Month 4 – Nyx Browser UI Redesign

Goals:

- Security-first browser identity

Deliverables:

- Minimalist UI
- Privacy indicators
- Permission transparency

Month 5 – UX Refinement

Goals:

- Polish & consistency

Deliverables:

- Animations (subtle)
- Accessibility improvements
- Dark/light theme optimization

Month 6 – Data-Driven Iteration

Goals:

- Let analytics guide development

Deliverables:

- Monthly UX reports
- Feature deprecation decisions
- Roadmap adjustments

Final Guiding Principles

- Ethics over hype
- Defense > offense
- Performance over bloat
- Trust over profit

This roadmap is designed to grow Aethar Tech into a professional, credible and sustainable startup in 2026.
